RUNNING GREAT RESTAURANTS

System Maps - Objectives

Click Back to Home Page

To ensure that our restaurant teams have the tools to run great restaurants, the **9 Restaurant System Maps** help improve operational performance, accurately diagnose opportunities and realize potential. The maps help optimize restaurant systems to consistently execute as designed to deliver a great customer experience, promote McDonald's Values and People brand standards, business growth, and return on investment.

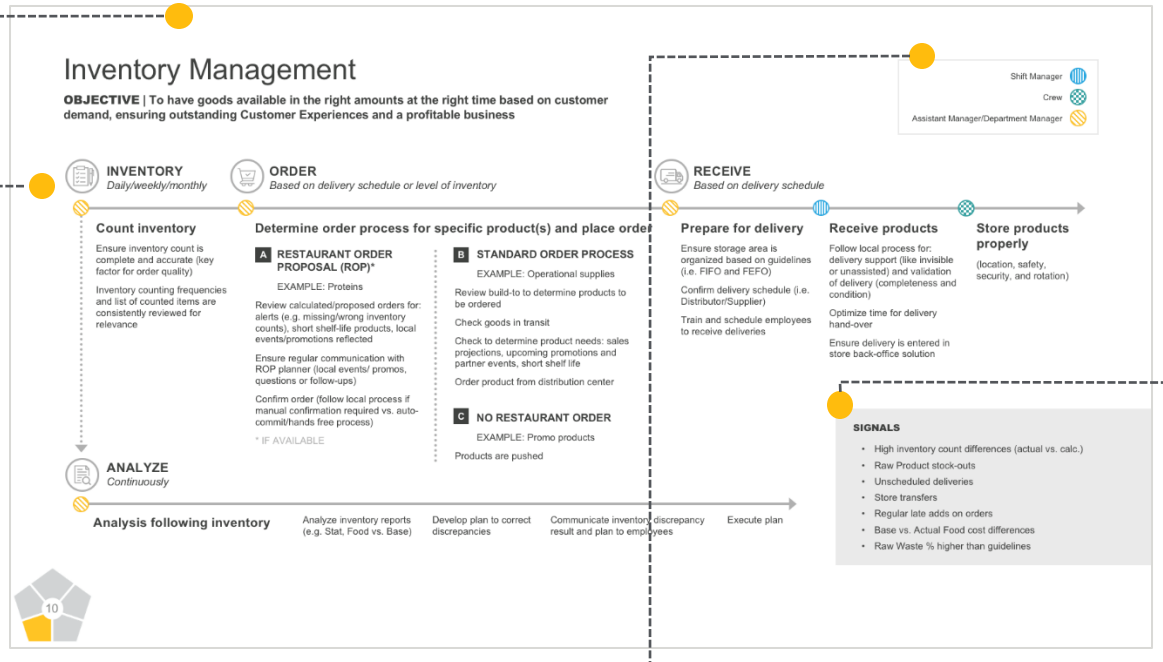

The maps can also be used as a stand-alone resource to develop newly promoted leaders.

To run great restaurants…

We need the ***right*** *people*	We need the ***right*** *systems*	We need the ***right*** *support*
• People Practices • Learning & Development Staffing, Scheduling & Positioning	• Shift Leadership • SPA (Service, Production, and Assembly)	• Health & Safety • Food Safety • Planned & Daily Maintenance • Inventory Management

Reading the System Maps

Click Back to Home Page

1 System name + main objective
Each of the nine systems has its own core objective with the ultimate goal of Running Great Restaurants.

2 Main process/ categorization
Along the top of the map, you'll find the main organizing elements for the system—whether it's a process step, system element, or other categorization.

3 Roles and responsibilities
Each activity and role within the system can be completed by a variety of team members. A primary point person has been identified but markets may adjust to suit their needs.

4 Signals
Each system has a set of signals to indicate where the system could break down—creating opportunities for growth and potentially triggering the need to set up an action plan.

Restaurant Systems

Individual System Maps

RUNNING
GREAT
RESTAURANTS

People Practices

Objective | People feel supported and empowered to bring their authentic selves to work and deliver an elevated Customer Experience

Restaurant Leader
Crew Trainer
Shift Leader/Department Leader

Click Back to Home Page

Doing all of these things helps position McDonald's to continue to attract high performing talent at a time when our restaurants need it most

Employee experience

People Manager executes system and General Manager verifies system is working

Attraction

Determine staffing needs

Execute a plan to enhance McDonald's employer reputation and attract the right candidates

Implement an internal recruitment plan (e.g., referrals)

Use an external recruitment campaign, where appropriate, to attract customer-centric candidates

Use a career site and /or Applicant Tracking System to share open jobs

Interviewing

Ensure there is a process in place to identify the most suitable candidates for each role

Utilize all local selection tools

Ensure appropriate leaders are trained on selection tools

Consider whether to hire an external candidate or promote from within for open positions

Treat all applicants fairly and model an inclusive environment

Hire for hospitality by evaluating applicants for customer-centricity

Onboarding

Leverage the crew and management onboarding process and ensure that experience is engaging (e.g. experiential session rather than simply reading/watching)

Communicate all local expectations, local policies, and procedures (including anti-harassment, discrimination & retaliation and violence)

Communicate the importance of the employee's role creating a safe and positive restaurant experience for customers and other crew

Complete all required administrative tasks

Provide necessary resources / gear (e.g. schedule, uniform, etc.)

Conduct 90 day follow-up for each new hire

Training

Train on tasks/stations

Focus on making the restaurant a safe, respectful and inclusive environment for everyone by leveraging available market-provided training (including anti-harassment, discrimination & retaliation and violence)

Focus on developing a connection with customers (e.g. Creating Feel Good Moments)

Managers coach crew on customer service behaviors

Reward & recognition

Implement and transparently communicate about reward and recognition programs that reinforce expected behaviors

- Reward hospitality (e.g. leader incentives for hospitality behaviors)
- Peer-to-peer digital recognition for crew

Host a crew outing / event every 6 months

Ensure regular pay raises are given

Restaurant communications

Leverage digital engagement platform to share key messages

Conduct employee surveys at least once per year and implement an action plan based on the results

Inform employees of new processes/technology being added to the restaurant, why, and how it elevates the customer experience

Career path & structure

Ensure a transparent review system is in place

Set goals and discuss future opportunities

Empower employees to solve inaccurate orders independently

Position crew in stations that fit their personalities and skills

Off-board (including exit interviews, administrative tasks etc.) to understand turnover impact and where action is needed

Implement a restaurant succession plan and ensure pay is competitive relative to market standard

Legal Requirements

Ensure compliance

Ensure full compliance with all local laws and employment legislation at every stage of the employment cycle

Signals

- Crew applications
- Crew hires
- Crew average time to hire
- Crew application to hire ratio
- Crew terminations
- Crew short-tenured terminations
- Crew hire to termination ratio
- Shift Leader Terminations
- Shift Leader short-tenured terminations

Learning and Development

Objective | To have engaged, high-performing and empowered employees delivering outstanding QSC and creating exceptional customer experiences

Guest Experience Leader · Team · Restaurant Leader · Mid Manager · Department Leader/Guest Experience Leader · Crew Trainer

Click Back to Home Page

Crew & guest experience leader development

Conduct orientation

Hire and orient new employees

Employees know performance expectations and how they will be recognized and rewarded

Schedule training

Ensure training is scheduled and ongoing for all employees

Conduct training analysis

Develop training schedule

Schedule training

Assign and introduce Crew Trainer to new employee

Conduct training

Conduct Restaurant and Station Training and complete required station verifications

Completes cross-training and coaching of employees on an ongoing basis

Ensures training resources remain up to date and available

All shoulder-to-shoulder training conducted following local social distancing guidelines when required

Continuing development

Conduct ongoing crew verifications for training on the stations throughout the restaurant

Suitable candidates for Crew Trainer position identified through ongoing observation

Suitable candidates for Guest Experience Leader identified through ongoing observation

Crew Trainer development

Onboard Crew Trainer to the role and provide ongoing support and coaching

Crew Trainer Development Program in place

Certify knowledge and demonstration of Crew Trainer on 3 Step Training Method

Conduct ongoing Crew Trainer verifications for training on the stations

Confirm certification of potential Crew Trainer in appropriate area of the restaurant

Identify potential employees for promotion into Shift Leader position

Guest Experience Leader development

Conduct Restaurant and Station training and complete required station verifications

Conduct coaching on ongoing basis

Completes relevant Guest Experience Leader training

Attend Creating Feel Good Moments workshop

Provide coaching and any required reverifications on an ongoing basis

MANAGER DEVELOPMENT

Shift Leader

Candidate completes the Shift Leader restaurant-based learning available through Fred and Campus including shoulder-to-shoulder shift training and Leadership Transitions and Advanced Leadership courses

Observes and provides daily/weekly shoulder-to-shoulder coaching and training.

Completes Shift leader verifications on an ongoing basis

Department Leader

Candidate completes Department Leader restaurant-based learning available through Campus and Developing the Leader in Me leadership course

Follow up and coach Department Managers on assigned department responsibilities progress with a focus on diagnosing to fix root cause, enhancing the Customer Experience and growing the business

Provides ongoing support and shoulder-to shoulder coaching and training

Restaurant Leader

Candidate completes Restaurant Leader restaurant-based learning available through Fred and Campus and Leading Great Restaurants leadership courses

To support continuous development candidate attends Leading for the Future course

Provides ongoing support and shoulder-to-shoulder coaching and training

Ongoing responsibilities

Ensure talent plan is in place

Stay engaged in the development of their people throughout the planning, coaching, observation, and regularly progress updates

Ensure training is completed for all employees according to schedule. Use the Training Needs Analysis, to look for opportunities for continuous improvement

Signals

- Crew Development Plan in place
- Crew Training/Crew Trainer Hours are Properly Scheduled
- Appropriate number of certified Shift Leaders for restaurant volume
- Talent plan for restaurant leadership positions in place and development time scheduled
- Appropriate number of certified crew and crew trainers for restaurant volume
- Ongoing training scheduled and completed
- Records or completed training matches scheduled training
- Training Needs Analysis in place

Staffing, Scheduling, and Positioning

Objective | To have the right people, in the right place, at the right time to run great restaurants and deliver a great customer experience

Restaurant Leader
Mid Manager
Shift Leader/Department Leader

Click Back to Home Page

Click to next page of SSP Map

Staffing
Monthly – Identify gaps and take action

- Ensure staffing and training needs analysis is updated monthly
- Recruit, hire and onboard number of employees according to staffing needs analysis
- Ensure crew availability, station abilities, and other information is accurate and meets business needs
- Ensure employees are trained according to training needs analysis

Scheduling
Weekly

- Build Managers' schedule
- Build crew schedule

Crew Scheduling
See next page

Positioning
Weekly

- Using market approved positioning guides, assign crew per availability, positioning needs, and crew competence for each day and shift
- React to business conditions during shift and reposition as needed

The right people

Managers scheduling and fixed labor hours

- Ensure there are enough certified leaders to cover shift needs and management tasks based on restaurant conditions
- Plan and schedule weekly tasks

  Review and update fixed labor hours guide
- Assign specific activities to people, guest service, and kitchen leaders
- Assign:
  - Management shifts to certified leaders only to ensure appropriate floor coverage for projections and managers-crew ratio
  - Remainder of manager hours to be assigned variable shifts
- Approve Manager's schedules
- Monthly schedule:

  Post approved monthly Manager's schedule at least 14 days prior to the beginning of the month (or as required by local law and regulations)
- Review last week's projections to capture unmet demand:
  - Projection effectiveness
  - Guest Counts (GCs) and sales trends
  - Promotions and events
  - Other projection tools
  - Feedback from management team (about projections)
- Project next week GCs and sales according to market guidelines and local drivers

Signals

- Projection Effectiveness
- Speed of Service
- Customer Satisfaction Survey
- Order Accuracy

Staffing, Scheduling, and Positioning

Objective | To have the right people, in the right place, at the right time to run great restaurants and deliver a great customer experience

Restaurant Leader

Scheduling
Weekly

Crew Scheduling
Review results to understand opportunities

Settings correct in scheduling systems

Restaurant conditions settings are correct in scheduling system

Forecast

Review the system generated forecast

Look three months ahead and review and approve staffing needs analysis

Review available data for opportunities in operational execution of standards

Ensure number of employees required by staffing needs analysis are on track (*90 day forecast)*

Project

Review last week's projections to capture unmet demand:

- Projection effectiveness
- Guest Counts (GCs) and sales trends
- Promotions and events
- Other projection tools
- Feedback from management team (about projections)

Project next week GCs and sales according to market guidelines and local drivers

Projection Effectiveness

hours where (Actual GC *minus* Projected GC) is within +/- 10

---

hours with data

Schedule to Projection

Determine variable labor needs by hour using market's approved positioning guide

Review VLH Guide and highlight potential shift shortages

Schedule fixed hours according to guide, including Guest Experience Leader

Build schedule using workforce management system

Ensure employment laws and McDonald's policies are followed

Floor Hours

Transfer management schedule

Ensure all Floor hours are covered based on crew to Manager ratio

Review and approve crew schedule to ensure all activities are planned and scheduled: training, planned maintenance, fixed hours tasks, and secondary duties

Post approved crew schedules at least 5 days prior; Manager's schedules at least two weeks prior end of the month, (or as required by local laws and regulations)

Actual vs. Scheduled

Discuss the schedule and its execution at weekly leaders meeting

Review results on a monthly basis and share at Managers Meeting

Shift Leadership

Shift Leader

Click Back to Home Page

Objective | Deliver outstanding QSC by coordinating People, Equipment and Product to grow sales profitably, and achieving total customer satisfaction one shift at a time.

Certified Shift Leader

Working day before shift

Read all communications from restaurant team

Review:

- Schedule for next shift and ensure enough staff is scheduled
- Promotions, initiatives

Complete:

- Positioning plan including any training needs
- Assign Area Leaders

Knowledge of:

•The restaurant current action plan and goals.

•Any current restaurant priorities or focus

Pre-shift

Assess restaurant operations prior to taking over the shift

Read all communications from restaurant team and share appropriate updates

Observe the appearance of the restaurant

Debrief / discuss with the outgoing shift leader about opportunities, trends, problems or barriers they encountered

Pre-shift planning

Complete, review, and prioritize shift plan

Complete a check list to identify priorities and opportunities

Create and prioritize a to do list

Check if any unavailable items & validate with product outage

Validate all equipment is in good working order or a Plan B established to mitigate customer impact

Review actual Guest Counts and sales for adjustments

Ensure sufficient Initiations points are prepared for volume

Adjust the positioning plan and assign secondary duties

Set and communicate realistic targets with Area Leaders

During shift

Diagnose the business conditions and customer flow of all channels by observing and knowing when you need to make adjustments

Customer Experiences:
Monitor OE-PE, R2P and Delivery restaurant times and review progress towards targets

Actively reposition crew and managers as business conditions and customer flow change

Prioritize and eliminate any service, production, and quality barriers. Identify pain points and work collaboratively with Area Leaders

Conduct regular travel paths to prioritize, delegate, and follow-up with: Heath & Safety, QSC, Customer Convenience, Appearance

Anticipate and react to Danger Zones

Food Safety:

Complete daily/monthly Food Safety checklist(s)

Ensure food safety and quality food.

Follow up on any food safety related customer complaints

People Interactions:

Provide ongoing feedback to crew, Area Leaders and managers relative to shift targets

Coach, empower, and assist crew when necessary

Openly and visibly recognize and reward crew for performance excellence

Role model hospitality interaction with customers, talking frequently with them

Work with Area Leaders to coordinate breaks according to plan, ensuring crew is engaged

Ensure customers and crew Health and Safety practices: cash procedures and physical plant

Follow the customer recovery process when necessary and handle complaints promptly and politely

Talk frequently with customers and ask about their experience

Acknowledge and thank each crew member at the end of their shift for contributions made

Post-shift

Reflect on how well the restaurant delivered on the shift leadership outcomes

Diagnose actual results compared to projected shift targets:

- Guest Counts and sales
- Customer experience and speed of service
- Labor effectiveness
- Raw and completed waste
- Tasks completion

Transition with the next incoming shift leader and communicate opportunities, trends, problems, or barriers

Reflect and plan for your next shift:

- Customer experience
- People, Equipment, and Product

Openly and visibly recognize and reward crew for meeting shift targets and performance excellence

Thank remaining shift crew for their contribution to the shift

Measures of a Successful shift

- Customer Feedback - QSC
- Guest Experience Leader hours

Decision making

- Kitchen Initiation Points open

Key Performance Indicators

- KVS Time per Entrée/Sandwich
- In-Restaurant Receipt to Present Time
- Curbside Receipt to Present (if available)
- DT Order End to Present End Time
- Pull Forward effectiveness
- Delivery Restaurant time
- Adequately staffed
- Labour target achieved

Service/Production/Assembly (SPA)

Crew

Click Back to Home Page

Click to next page of SPA Map

Objective | Engaged, empowered employees delivering seamless Customer Experiences, exceeding customer expectations, and delivering outstanding quality and service by operating as designed

Service - *Order*
Beginning of customer journey

Customer arrives & order placed

In a traditional ordering process, crew will:

- **Immediately greet the customer,** identify digital customers by name
- **Take order**
- **Process payment**

In ungated ordering, much of this process is unassisted and led by customer

Ensure crew do not gate Delivery orders

Production
Items are made to order for customer

Preparation

The order is displayed on KVS in relevant production area for crew to prepare (Made For You, Fries, Beverage & Dessert, etc.)

MFY food arrives in OAT for assembly and beverages arrive at the BLZ

Assembly
Order prepared for presentation

Order assembled

Order Assembly team builds order utilizing pick ticket, ensures orders are accurate and looks for out of sequence presenting opportunities

For Delivery; when demand reaches 10 orders per hour, a separate and additional delivery station is needed to reduce congestion at the OAT. The Delivery Station is used for all Delivery orders when present in the restaurant to ensure consistency. Use the Delivery Ops Solutions matrix to scale.

Service - *Fulfillment*
End of customer journey

Order presented

Order is presented (Front Counter, Drive Thru, Curbside, Table) and customer is bid farewell.

Identify digital customers by name

For Delivery: All bags are sealed and handed off to the Delivery courier at the same time for accuracy.

Signals

- In-Restaurant Receipt to Present Time (R2P)
- DT Order End to Present End Time (OE-PE)
- In-Restaurant and DT order taking effectiveness
- Drive Thru Payment and Present effectiveness
- Kitchen Initiation Point effectiveness
- In-Restaurant and Drive Thru Assembly effectiveness – pick and go is achieved
- Delivery, Table Service and Curbside fulfillment effectiveness
- Inaccuracy measurement

Customer journey
The path a customer follows

Customer touchpoints

Customer experiences that the crew may influence

Pre-Visit

Arrive

Enter Restaurant

Staff/Guest Experience Leader welcome

Staff tidy

Wait & Order

Help with ordering

Engaging/small talk

Staff friendly & helpful

Wait & Collect

Food always served fresh

Order fully complete including condiments

Friendly, personalized interaction

Served within service standards

Couriers are treated as customers

Eat

Food presented in appetizing manner

Customer remains comfortable

Food tastes as expected

Food not smashed/squished

Tables/floors clean

Extend, Dispose, Close-out

Safe/fun for kids

Restrooms clean

Leave Restaurant

Goodbye / thank you!

Post-Visit Reflecting

Staff made me want to come back

Assembly

From production

Assemble order

Order should be bumped before leaving OAT, Runner should use pick ticket to assemble and never return to OAT. If Delivery Station is present all sandwiches per order are expedited away from the OAT. Delivery Fries and Drinks are added only at the Delivery Station.

A With Expeditor

Expeditor

- Positioned at OAT
- Gets info from Expeditor Monitor
- Sorts product at OAT
- Places on tray for eat-in or on bags for to-go
- Bumps order from monitor and prints pick ticket
- Places pick ticket with food so runner can read

Runner / DT runner

- Refers to pick ticket for remaining items
- Determines what size bag is needed
- Picks up Fries, Beverage & Dessert

B Without Expeditor

Runner / DT runner

- Starts at OAT
- Selects bag or tray
- Assembles per McDonald's assembly sequence
- Places condiments on tray / in bag
- Refers to pick ticket for remaining items
- Picks up Fries, Beverage & Dessert

Core minimums

Crew executes tasks, Shift Manager monitors tasks, General Manager verifies system is working

Building and equipment in good repair

Broken tiles etc.

Potable water supply available

Especially 0.2 micron filters

Ensure that pest management program is in place and working effectively

Including keeping restaurant and any area clear of infestation

Good health and personal hygiene

Especially handwashing, hand sanitizing and good health

Clean and sanitize building interior, equipment and restaurant surfaces

Achieve and ensure temperature minimums and time controls

Product flow

Receive food

Ensure all food, paper and chemicals are from approved sources

Frozen products (beef, pork, chicken, fish and McPlant) at -18°C/0°F or colder; Refrigerated products at or below 4.4°C/40°F

Store food

FROZEN
Product temperature at or below -18°C/0°F

REFRIGERATED STORAGE
Product temperature below 4.4°C/40°F

SHELF-LIVES
All primary and secondary shelf lives adhered to

STORAGE
Store according to standard (off the floor, away from walls, covered, etc.)

Prepare food

Adhere to shelf life procedures for all products

Adhere to local allergen management protocols

Cook raw food

CHICKEN
Cook to 74°C/165°F or above

BEEF OR PORK
Cooked to 69°C/155°F or above

FISH
Cooked to 71°C/160°F or above

SHELL EGG PRODUCTS
Cooked to 69°C/155°F and until the yolk is gelled and not runny

BREAKFAST MEAT
Cooked to 69°C/155°F or above

McPlant
Cook to 74°C/165°F or above

Hold food

Cooked foods held at or above 60°C/140°F (UHC and hot holding units) within holding time

Signals

- Hourly hand washing system in place
- Only healthy employees working with good personal hygiene
- Complete and accurate Daily Food Safety checklists
- Complete working pyrometer kit/Pyrometer
- Working Digital Food Safety System
- All Products within code
- Clean utensils, equipment and building
- Health inspection violations, Food Safety customer complaints, Food Safety or Ops PACE Verifications actioned for improvements
- No pest infestation, signs of broken equipment, building disrepair or inaccurate thermometers
- Water filters properly used and changed within acceptable dates

Food Safety

Objective | To always serve safe food to our Customers

Food safety

Daily Checklist

Set up

Pyrometer calibrated and equipment functioning correctly

Digital food safety functioning correctly with Bluetooth leveraged for all meat integrity

Proper disposable gloves are stocked at each station

Correct sanitizer concentration being used

Required supplies at all hand sinks

Hand sanitizers or handwashing station available at all kitchen entrances

All employees appear healthy

All chemicals, food, packaging and equipment from approved suppliers

Start up

All refrigeration units and refrigerated products are at the proper temperature

All freezer units and frozen product at the proper temperature

Open products covered or wrapped

Holding times and shelf-lives are marked and followed

(Delivery meets all food safety standards)

Breakfast check

Breakfast sausage checked for internal temperature of 69°C/155°F

Shell eggs cooked to 69°C/155°F and until the yolk is gelled and not runny

Regular menu check

Beef and/or Pork checked for internal temperature of 69°C/155°F

Chicken checked for internal temperature of 74°C/165°F or above

Fish cooked to 71°C/160°F or above

McPlant checked for internal temperature of 74°C/165°F or above

Monthly Checklist

Health and hygiene

All employees are healthy and adhere to ill worker guidelines

Employees are following personal hygiene practices

Proper handwashing and hand sanitizing procedures are followed

Cross contamination prevention procedures followed

Proper use of blue gloves (for raw products) and white disposable gloves as required

Procedures and standards

Cleanliness and Sanitation procedures followed (including non-food spill procedures)

Approved cleaning supplies in place and used correctly

Food, packaging and equipment from approved suppliers

Food Handling procedures correct

Food Safety Standards met

Food Storage correct

Ice handling procedures in place

Equipment and building standards met

Documentation and training

All leaders are trained and certified on food safety (advanced or according to local guidelines if more stringent)

All employees trained and verified on food safety and sanitation

Verify all violations corrected from health inspection and food safety report

60 days of daily food safety checklists completed correctly (on paper or digital)

Last 2 monthly food safety verifications complete

Food safety action plan in place and being executed for continuous improvement

Support systems

Pest prevention process in place and no sign of pest infestation

Waste Management process in place

Approved water filters are in place, labeled and changed on time

Planned maintenance and cleaning completed on all food equipment and building

Health department requirements and food safety verification met

“Any additional systems” such as shake/sundae inspections, grill certifications, etc.

Health and Safety

Objective | A safe and secure environment that enhances your customer and employee experience while adding value to the business

Restaurant Leader

Assistant Manager/Department Leader

Click Back to Home Page

Click to next page of Safety & Security Map

Safety

Restaurant conditions

People

Responsibilities, training, and policies governing employees and customers

Frequency: On-going

All employees are trained on health and safety policies, guidelines, and procedures following their country's requirements and are empowered to implement and enforce safety guidelines,- including reporting and correcting safety issues or hazards

Managers act as a role model and motivate crews to ensure health and safety standards are in place and followed

Communications

Communications and reporting for safety-concerns

Frequency: On-going

A competent health and safety committee team is established and maintained as required by local regulations and meets regularly to reinforce safety awareness

Frequency: Daily routine

Unsafe conditions are reported immediately to General or Shift Manager

Hazardous conditions are fixed immediately during pre-shift travel path

Equipment

Application and maintenance of safety-related equipment including proper use, installation, and storage

Frequency: Daily routine

All personal protective equipment (e.g., face shield, apron, gloves, oven mitts, visibility vests) is accessible, clean, in good condition, and being stored properly and used correctly

All fire extinguishing equipment is visible, accessible, operational and in good condition

CO2 (Carbon Dioxide) tank, beverage, cylinder systems, detectors and warning-signage are secured/installed correctly and in good condition/operational.

Frequency: Semi-annual

An automatic, fixed fire suppression system(s) installed over all fryers and grills, is in good condition and inspected and serviced by a qualified service company at least every six months

F/K Class fire extinguisher is present and operational

Physical Safety

Maintaining a safe and secure environment for employees and customers

Frequency: Daily routine

Floors and play areas are in a safe and clean condition

Parking and Drive-thru crosswalks are clearly marked, kept clear of obstructions and in good condition

All emergency exits are unobstructed, visible, accessible, operational, and in good condition

Frequency: Monthly routine

A workplace safety inspection is completed monthly and appropriate corrective actions taken

Process

Following proper procedures for the safety and security of the restaurant employees and customers

Frequency: Daily routine

Restaurant management ensures host country's health and safety laws and McDonalds safety standards are followed

All claims are reported following country requirements within required time period and injuries are followed up on

Every claim is managed and an accident/incident investigation completed following country requirements

Injuries are treated immediately by trained first aid personnel

Frequency: On-going

Comply with local safety regulations regarding emergency response, signage, and equipment

Chemicals are properly labeled and stored, and safety data sheets are available to employees

Signals

- Incident data
- Inspection reporting
- SOC s completion per crew following country requirements
- Equipment fires
- Safety Violations:
- Safety-related complaints
- Rising claim costs or increasing injury frequency
- Ops PACE safety score

Health and Safety

Objective | A safe and secure environment that enhances your customer and employee experience while adding value to the business

Restaurant Leader

Assistant Manager/Department Leader

Click to previous page of Safety & Security Map

Security

Restaurant conditions

People

Responsibilities, training, and policies governing employees and customers

Frequency: On-going

All employees are trained on security policies, guidelines, and procedures following country requirements and are empowered to enforce security guidelines, along with reporting and correcting security issues

Managers act as a role model and motivate crews to ensure security standards are in place and followed

Communications

Communications and reporting for security concerns

Frequency: On-going

Report suspicious / criminal activity, loitering, or vandalism to the authorities and immediately report this information to your GM.

All cash management variances over guidelines must be reported immediately to the restaurant leader and supervisor e.g., cash shortages, promo variance, high T-Reds and B-Reds.

Equipment

Proper use and maintenance of security equipment is important

Frequency: On-going

Ensure security equipment is checked and maintained regularly to ensure the equipment is operating as required e.g., CCTV system, safe, and hold-up alarms

Security equipment access codes are up to date and provide maximum security

Equipment is approved and meets global and national standards

Security signage is posted on lobby doors and drive-thru windows as appropriate i.e. CCTV, Burglar Alarm, Armored Vehicle, Access to inner safe, etc.

Physical Safety

Maintaining a safe and secure environment for employees and customers

Frequency: Daily routine

Immediately correct any security violations or unsafe related conditions (e.g., damaged equipment, vandalism, unsafe walkways, windows, doors, etc.)

Rear / side / play place doors should be locked, alarmed, functioning properly and equipped with an working and unobstructed external view device

Eliminate blind spots for hiding and obstructed views in and out of the restaurant

Drive-thru windows have self-latching locks which are in good operating condition

Process

Following proper procedures for the safety and security of the restaurant and people

Frequency: On-going

Change restaurant locks, safe combinations, and POS access codes when a maintenance or a member of management is terminated, reassigned, or transferred according to security guidelines

Call local law enforcement for emergency situations e.g., robbery, burglary, assaults, shooting, bomb threat etc.

Report all crime issues and incidents to your supervisor or O/O, and field security leader e.g., armed robbery, assaults, shooting, scams, bomb threats or other serious incidents

Maintain, develop, and strengthen your relationship with local law enforcement

Frequency: Daily routine

Check security equipment and take appropriate steps in fixing non-working equipment e.g., CCTV system, burglar intrusion system, safe, hold-up alarms etc.

Ensure backdoor and trash disposal policies are followed

Ensure cash control policies are followed according to policy (e.g., skims, promos, and cash variances etc.)

Ensure staggered method of opening and closing

Bank deposits are handled according to policy

Signals

- Training completed & documented
- SOC's completion per crew (following country requirements)
- Crew and leader accountability
- Security equipment standards in place
- High promo, overrings, refunds, meals, T-Reds / B-Reds
- Law Enforcement Partnership / Engagement
- Back door policies
- Incident reporting ensured
- RGRV Health & Safety score

Planned & Daily Maintenance

Objective | Ongoing care and maintenance of equipment improving quality, service, and cleanliness, that minimizes downtime, reduces operating costs, ensures food/employee safety, and extends the life of equipment

Planned/scheduled maintenance

Provide resources

Ensure current and complete PM reference materials and tools are available and in use

Train employees to perform PM tasks

Assign and schedule employees to perform PM tasks

Schedule PM tasks that require a qualified technician

Perform maintenance tasks

Perform maintenance tasks per PM Calendar, required:

- Weekly
- Bi-weekly
- Monthly
- Quarterly
- Semi Annual
- Annual

Ensure completion of planned maintenance tasks

Verify and sign off completed PM tasks

Bi-annual certifications

Fire suppression systems

Fire extinguishers

Other emergency equipment per local code:

- Fire alarms
- Emergency lighting

Annual certifications

Grills

CO detectors

Beverage Tower Recovery Program

CO tank, beverage, and/or cylinder systems are in good condition

Daily/ongoing maintenance

Provide resources

Ensure availability of proper tools and supplies to perform daily maintenance tasks

Train and schedule employees to perform daily maintenance tasks

Trained maintenance person assigned daily

Provide a separate checklist to follow up on completion of daily maintenance tasks

Perform maintenance tasks

Complete daily checklists for:

- Weekly
- Bi-weekly
- Monthly
- Quarterly
- Semi Annual
- Annual

Ensure completion of maintenance tasks

Verify completion of all checklists and tasks

Equipment failure

Diagnose equipment and physical plant failures → **Address equipment and physical plant failures** → **Plan of action in place to call for service** → **Ensure completion of tasks and that equipment is working**

Signals

- % of Peak Hours Down Key Production/Assembly Equipment
- % of Planned and Scheduled Maintenance Calendar Completed
- CO Detectors Certification
- Fire Suppression Systems Certification
- Annual Grill Certification

Inventory Management

Objective | To have goods available in the right amounts at the right time based on customer demand, ensuring outstanding Customer Experiences and a profitable business

Inventory
Daily/weekly/monthly

Count inventory

Ensure inventory count is complete and accurate (key factor for order quality)

Inventory counting frequencies and list of counted items are consistently reviewed for relevance

Order
Based on delivery schedule or level of inventory

Determine order process for specific product(s) and place order

A **Restaurant Order Proposal (ROP)***
EXAMPLE: Proteins

Review calculated/proposed orders for: alerts (e.g. missing/wrong inventory counts), short shelf-life products, local events/promotions reflected

Ensure regular communication with ROP planner (local events/ promos, questions or follow-ups)

Confirm order (follow local process if manual confirmation required vs. auto-commit/hands free process)

* IF AVAILABLE

B **Standard order process**
EXAMPLE: Operational supplies

Review build-to to determine products to be ordered

Check goods in transit

Check to determine product needs: sales projections, upcoming promotions and partner events, short shelf life

Order product from distribution center

C **No restaurant order**
EXAMPLE: Promo products

Products are pushed

Receive
Based on delivery schedule

Prepare for delivery

Ensure storage area is organized based on guidelines (i.e. FIFO and FEFO)

Confirm delivery schedule (i.e. Distributor/Supplier)

Train and schedule employees to receive deliveries

Receive products

Follow local process for: delivery support (like invisible or unassisted) and validation of delivery (completeness and condition)

Optimize time for delivery hand-over

Ensure delivery is entered in restaurant back-office solution

Store products properly

(location, safety, security, and rotation)

Analyze
Continuously

Analysis following inventory

Analyze inventory reports (e.g. Stat, Food vs. Base)

Develop plan to correct discrepancies

Communicate inventory discrepancy result and plan to employees

Execute plan

Signals

- High inventory count differences (actual vs. calculated)
- Raw Product stock-outs
- Unscheduled deliveries
- Restaurant transfers
- Regular late adds on orders
- Base vs. Actual Food cost differences
- Raw Waste % higher than guidelines
